

Beyond the Workshop: Wonders of Weather

In our Wonders of Weather workshop, you learned about temperature, the water cycle, and how weather tools are used to make measurements. Let's go beyond what we learned!

Explore

Watch this video to learn about the difference between weather and climate:

[NASA: Climate Kids](#)

Guide your exploration:

1. What is one way predicting the weather can help us plan for the future?
2. What is one way predicting changes in climate can help us plan for the future?
3. Which are more noticeable, changes in weather or climate? Why?
4. What tool is used to measure changes in climate?

Explore

Visit this website to explore the Earth through satellite imagery:

[NASA: Eyes on the Earth](#)

Guide your exploration:

1. Pick an article that interests you and summarize it.
2. What kind of impact does the topic of your article have? What scale is it (community, national, global)?
3. Is there anything from this article that could impact your community?

Engage

Chart your weather and notice patterns with this NASA Activity:
